

BRUCE R. MADDERN, M.D., P.A.

*Pediatric Otolaryngology
Head & Neck Surgery*

Name: _____

Date: _____

DOB: _____

We have discussed the potential benefit of the surgery as well as the treatment alternatives of medical therapy. We have discussed the risks of the surgery including but not limited to the anesthetic, bleeding, trauma to operative site and the possible need for additional treatment or surgery. We have discussed peri-operative diet and activity restrictions, fever, pain and the importance of maintaining adequate oral intake.

Questions have all been answered.
